Diamonds

The underestimated opportunity

Diamonds have been among the most value-stable and promising investment assets for years, but so far only a few have taken advantage of this potential.

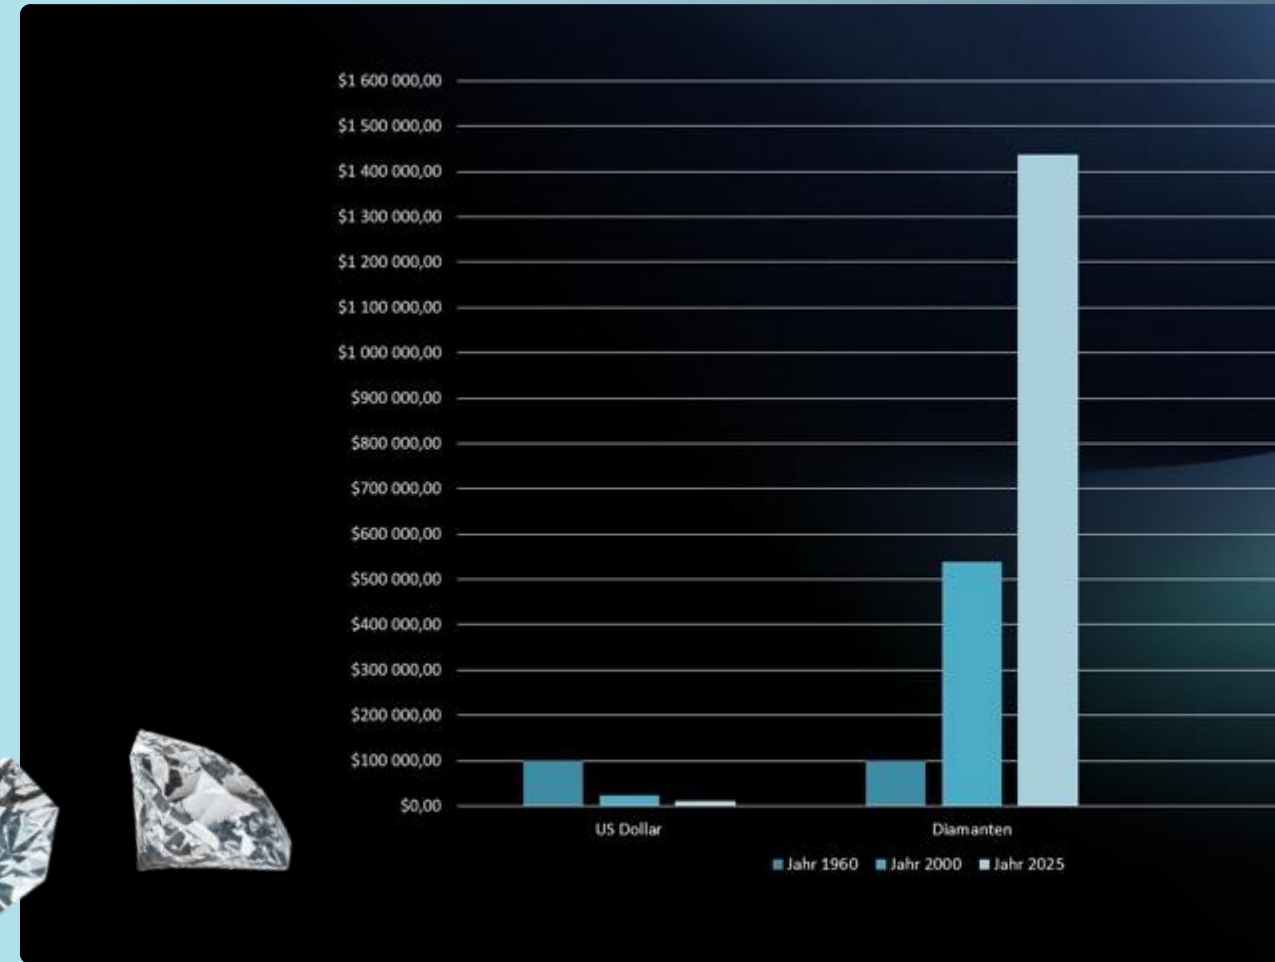

With our **DIAMOND SOLUTION** we are opening access to these extraordinary opportunities for everyone for the first time.

Main Reasons for Diamonds

Diamonds are tangible real assets that exist independently of currencies and financial systems and have preserved their value for centuries. They represent highly concentrated value, globally tradable, permanently durable, and provide long-term protection against inflation and loss of wealth.

Diamond Solution

Your possibilities

After your Diamond Solution Plan ends, you can either sell your diamonds back to us or have them delivered to your home.

Have it delivered

Diamonds (Carats) at the price of your DS plan*

Sell to us

You can sell your diamonds back to us at the purchase price you paid.

Sell to third parties

You can sell your diamonds to third parties.

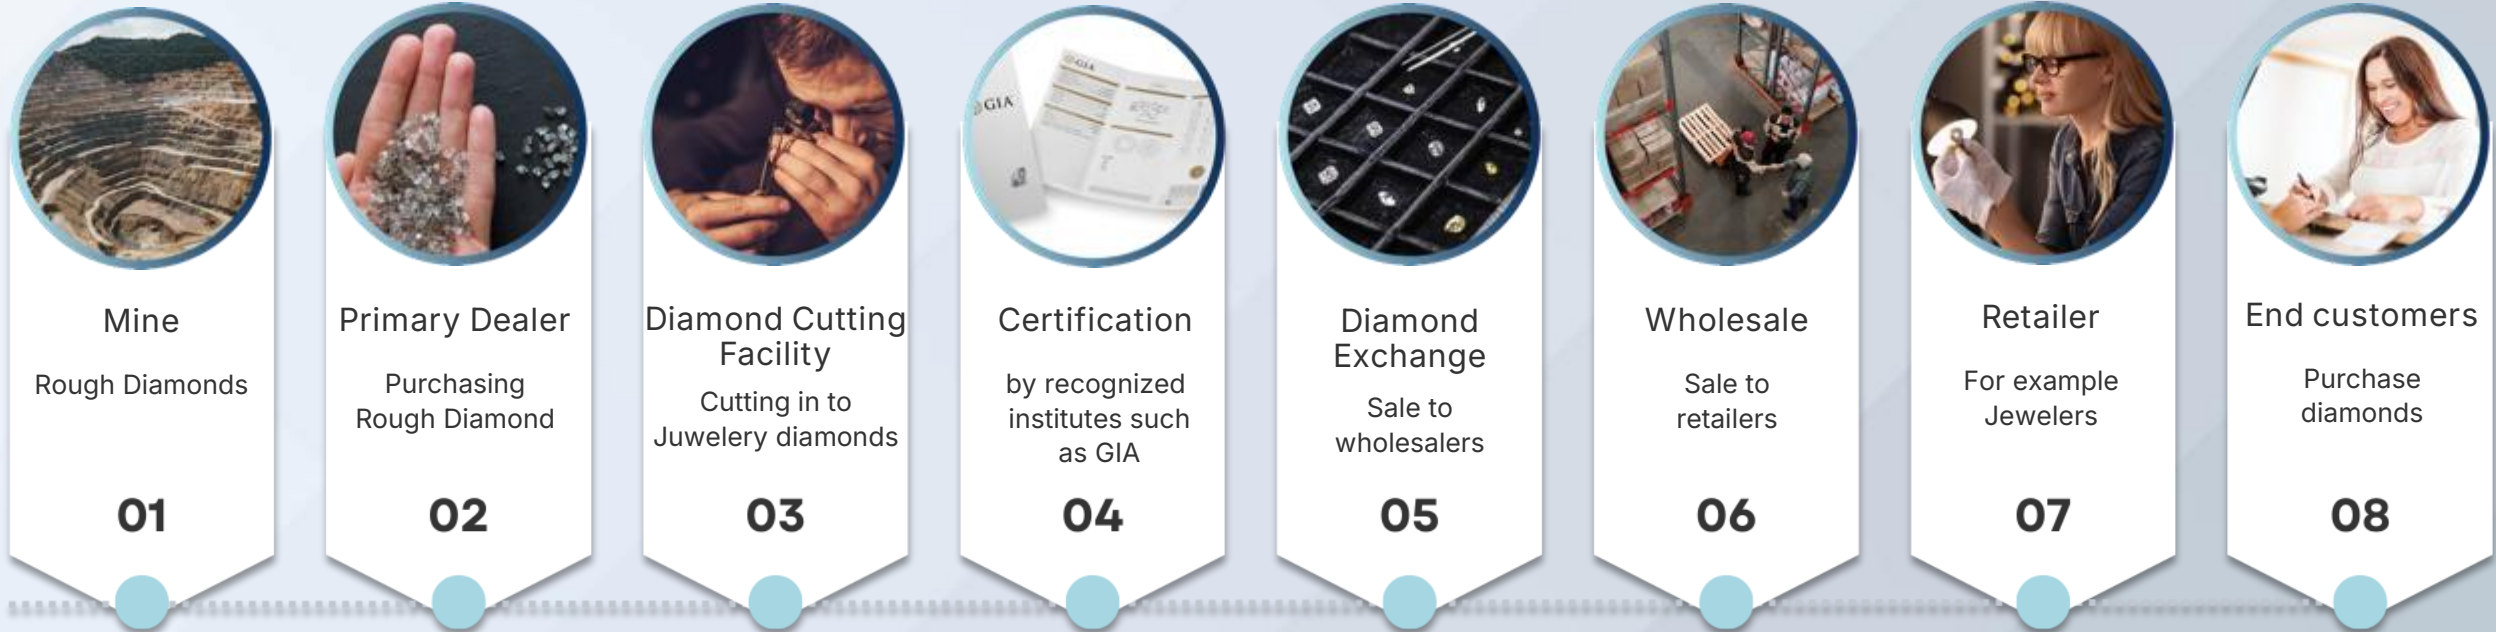

*DS plan stands for Diamond Solution Plan.

HOW IS THAT POSSIBLE?
From the source to the customer!

The traditional way

Before a diamond reaches the end customer, significant trading margins are added through intermediaries, wholesalers and retailers, compared to the rough diamond price at the mine.

The Diamond Solution Way

We break this cycle by purchasing the rough diamonds directly from the mine, having them cut and certified through our partners. This allows us to pass these trade margins on to our customers in the form of Discount Credits.

*DS plan stands for Diamond Solution Plan.
